

Compass

chewings tall fescue

FEATURES	BENEFITS
Dark colour, compact habit	Faster to establish and crowd out weeds
Tolerates closer mowing	Maintains better density under closer mowing
Drought tolerant	Will withstand lower watering regime
Improved pest & disease resistance	Reduced impact of disease in turf

General Description

Compass chewings fescue exhibits a slightly broader leaf than other fescues, more compact height and attractive seed heads; makes an ideal companion with perennial ryegrass or Kentucky bluegrass in temperate or over sowing mixtures.

Its compact height and attractive seed head design contribute to a wavy dunes look in un-mown areas.

Compass is best suited to shaded and lower fertility applications.

Sowing rate

New seeding application	4-5kg/100m ²
-------------------------	-------------------------

It can be included in turf mixes at up to 33% of the mix.

Suggested for inclusion in blends for golf course roughs, parks, slopes, unmowed swards and shaded elite turf mixes.

Areas of use:

AREA	SUITABILITY
Golf Course - Greens	
Golf Course - Tees	
Golf Course - Fairways	suitable
Golf Course - Roughs	ideal
Parks & Gardens	ideal
Sports fields	suitable
